## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 12/19/2007 have been fully considered but are considered moot in view of the new grounds of rejection below.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over HEARD ET AL (US 5996311) in view of PICKEL ET AL (US 6354427).

HEARD ET AL discloses a device for screwing a cap (77) onto a container (12). A closing head (70) is surrounded by a hysteresis ring and permanent magnets, which rotate as the cap is screwed onto the container. (see column 3 lines 24-50, column 5 lines 15-47, and figures 1-2.). A control unit rotates a cam (84) around a track, governing the movement of the push rod (20) (see Fig. 2).

HEARD ET AL does not disclose the closing head as using grippers.

PICKET ET AL discloses a container handling device with gripping units (24) consisting of tong grippers (24) that are moved by means of cam tracks (see Fig. 1)

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of HEARD ET AL by using the grippers of PICKET ET AL in order to more delicately grip the caps.
